

SHIVCHANDAR KUMAR SAH

MERN / MEVN Full-Stack Developer

Sitapaila, Kathmandu | +977-9825808450 | sahshivchandar14@gmail.com

GitHub: github.com/shivchandarsah | LinkedIn Profile

PROFESSIONAL SUMMARY

Computer Engineering graduate and full-stack developer with hands-on experience building production-style MERN and MEVN applications. Experienced in authentication, role-based access control, real-time communication, REST APIs, database integration, and deployment. Built and deployed Bolts Army, a full-stack business management application, and Support Hub AI, an AI-powered customer support platform with role-based dashboards, real-time chat, knowledge-base/RAG features, and automation-oriented workflows.

TECHNICAL SKILLS

Languages: JavaScript, C#, Kotlin, HTML, CSS

Frontend: React.js, Vue.js, HTML5, CSS3, JavaScript (DOM/ES6+)

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control

Database: MongoDB, Mongoose, MySQL

Real-time: Socket.IO, WebRTC, real-time chat & video

Mobile: Android Development (Kotlin, XML)

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Render

PROJECTS

Support Hub AI — AI Customer Support & Automation Platform

Full-Stack SaaS Project | React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, RAG/Pinecone

- Built an AI-powered customer support platform with separate admin and agent dashboards, role-based access control, and secure authentication.
- Implemented real-time customer-agent chat using Socket.IO, with conversation management and file/document support.
- Developed a knowledge-base and RAG workflow to ground support responses in uploaded business documents and improve organization-specific assistance.
- Added account security and SaaS features including JWT access/refresh authentication, TOTP 2FA, password reset, rate limiting, profile management, notifications, calendar events, and invoice PDF export.
- Deployed the frontend on Vercel and backend on Render, with production environment configuration, CORS handling, and database connectivity.

Bolts Army — Business Management / CRM Platform

Full-Stack Project | React.js, Node.js, Express.js, MySQL, Sequelize, JWT

- Developed a full-stack business management platform with role-based authentication and user-focused dashboards.
- Built RESTful backend APIs, database-driven workflows, authentication, and frontend interfaces for core business operations.
- Worked across the complete application stack, including React UI, Node/Express services, MySQL database integration, validation, and deployment configuration.

Siksha Mantra — MERN Stack Learning Platform

University Semester Project | Team of 5 | MongoDB, Express.js, React.js, Node.js

- Led core development on a full-stack platform connecting students and teachers for paid, one-on-one learning sessions.
- Built role-based authentication and authorization for student, teacher, and admin permissions.
- Implemented real-time chat and video calling, appointment booking, offer management, and secure payment processing.

Smart Invoice — MEVN Stack Invoicing Solution

University Semester Project | Team of 4 | MongoDB, Express.js, Vue.js, Node.js

- Owned the frontend build, translating design requirements into functional Vue components.
- Contributed throughout the project lifecycle, including UI setup, feature integration, and bug fixes.

Inventory Management System — C# Desktop Application

University Project | C#, Windows Forms

- Built a Windows desktop application to track inventory levels, stock updates, and item records.

EDUCATION

Bachelor of Computer Engineering (BCE) | 2022 – 2026

Cosmos College of Management and Technology, Sitapaila, Kathmandu

+2, Science (NEB) | 2019 – 2021

Nasa National Secondary College, Tinkune, Kathmandu | GPA: 3.15
